

INTRODUCING...

The best
performance
and value for
every project!

The new TX3 Telephone Entry and Card Access Integrated System delivers a whole new world of performance and value in any configuration. From small apartment/condo to large commercial applications, the TX3 integrated system is ready with the most extensive list of features available:

- Rugged auto-dial entry panels with an array of indoor/outdoor and surface/flush configurations
- Optional NSL (no phone bill) telephone wiring
- Expandable elevator control (up to 96 relays per controller)
- Expandable, full featured, card access (up to 126 readers)
- Optional gate control with wireless transmitters

The TX3 is the new expandable and scalable solution your business has been waiting for!
