

UHF Desktop Card Issuer- 860 ~ 960MHz

Model: UHFDR

This is a small desktop reader, compatible with ISO 18000-6C and ISO 18000-6B standards. Its operating frequency is 902- 928mhz (FCC),865-868mhz (CE). It is a small integrated reader for short-distance identification or background card issuer management. Small and easy to carry, it is suitable for personnel access control, image document management, and electronic tag reading, writing, authorization, formatting and other operations.

Model	UHFDR
Operating Frequency	902- 928mhz (FCC),865-868mhz (CE)
Read Range	> 1 meter
Output Power	0-30dBm (Adjustable)
Support Protocol	ISO18000-6B , ISO18000-6C (EPC GEN2)
Antenna	2 dBi linearly polarize antenna (Integrated)
Communication Port	USB
Power	+5V
Prompt	Beep or LED light flash
Power Consumption	<1W
Weight	0.19KG
Dimension	136*85*20mm
